THERE'S A REASON BEHIND THIS
FEMALES GET SMALLER PORTIONS FOR A REASON
SOB SOB

BUT FEMALES STORE CALORIES, SO THEY GET SMALLER SERVINGS
ちんまり TINY SCOOPS..
こもり PILED HIGH
UNDER STRESS, MALES BURN CALORIES, SO THEY GET LARGER SERVINGS
www.nagomi.com
OK?
I'M NOT THE ONLY ONE SUFFERING
THE AVERAGE AMERIGON MEAL IS 1300 CALORIES!
WE WANT MORE!
WE DON'T CARE!

When in line, shorter recruits get smushed between taller recruits' backs and boobs. We couldn't appreciate the scenery around us (not that there was any pleasant scenery in the first place but....)

I think one of the reasons they separate females and male recruits during boot camp is the difference in food portions each gender is allowed to eat.

When female recruits were tasked to serve male recruits during rifle range training, it was an eye-opening experience to see the males load their trays, while we could only eat TV dinner-like premade diet trays, which was nuked to 200 degrees and had mysterious brown sauce on a few globs of food-like substances, all probably under 300 calories or something. My stomach was growling the whole time I was at the rifle range...(
